

Bulletin No: 188**Date:** March 21, 2011**Subject:** RFID Shield Kit**Models:** McDonald's AXIOM**Effective Date or Serial Number:** Effective immediately

Purpose

When multiple sets of RFID brewers are placed closer together than 4-5 inches there can be cross interference of signals. As a result, the carafe's time freshness indicator may not function properly

Action

Upon customer request, installing the RFID shield between multiple sets of machines will prevent signal transfer between machines that are placed closer together than 4-5 inches. The RFID Shield Kit it PN is 44113.1000.
