

Why	To maintain food quality standards for iced tea	
Time required	5 minutes to prepare	20 minutes to complete
Time of day	At close	For 24-hour restaurants: during low-volume periods
Hazard icons	 Hot Liquids/Steam	

Tools and supplies

Brew basket

Iced tea dispenser, empty

Volume cup

Procedure

1 Prepare brewer.

Slide an empty brew basket onto the guide rails. Place an empty dispenser on the brewer base.

Tip
Before calibrating the brewer, fill a dispenser with enough iced tea to continue serving guests.

2 Press brew switch “C” (UNSWEET TEA).

Allow the brewer to run for an entire cycle.

3 Measure water volume.

Carefully dispense the hot water from the dispenser into a volume cup. You may need to empty and refill the volume cup. The total water volume should be 2.5 gallons, (320±5% [304-336] ounces) (9.5 [9-10] liters).

4 Adjust brew volume.

If the water volume needs to be adjusted call your local service representative.

Hot Liquids/Steam
The water is hot.
